125 E Bullock Science Center

Office Hours: Tuesday and Thursday 10:00-11:00 a.m., or by appointment

Fundamentals of research methodology in psychology. Topics include experimental, quasi-experimental and descriptive research designs, internal and external validity and research ethics. Prerequisite: PSY 206. This is a 4-credit hour course in which we will meet in the classroom for 3 hours each week. The additional credit hour will allow for course readings to be completed before class. This course will also involve projects, reading assignments and studying to be completed outside of class time.

Learning Goals: Students will understand and apply basic research methods in psychology, including research design, data analysis, and interpretation—*Learning Goal 2 of the American Psychological Association Guidelines for the Undergraduate Psychology Major (2006)*

- ❖ Every student will participate in data collection and analyze data as part of the course
- ❖ Every student will write about data and results
- ❖ Every student will continue to learn about statistical tests and when to use them
- ❖ Every student will continue to practice SPSS
- ❖ Every student will be continue to practice APA style
- ❖ Every student will write a final research paper that is at least 10 pages and in APA style
- ❖ Every student will participate in an oral presentation about her research for at least 10 minutes
- ❖ Every student will create a poster about her research

REQUIRED READING MATERIAL

Christensen, L. B., Burke Johnson, R., & Turner, L. A. (2011). *Research methods, design, and analysis* (11th edition).

American Psychological Association (2010). *Publication manual of the American Psychological Association* (6th edition, 2nd printing).

Reading Assignments: In this course the textbook provides a good foundation of research design. In class we will apply this material using demonstrations, group discussions, videos, surveys, and lecture. Also in class, additional related information not in your textbook will be covered.

Students also should be aware of the fact that not all of the material in the textbook can be covered in class, but they are responsible for knowing all of the material in the textbook even if it is not covered in class. To learn the most from the course students should keep up with the reading assignments and come to class.

CLASS COMPONENTS

Attendance “Quiz” Points: It is important to attend lectures in this course, as lectures will involve demonstrations, classroom activities, films, and discussion of material not covered in the textbook. Students are expected to attend class regularly, as regular attendance will contribute to a better overall understanding of course material.

Attendance will be taken at every class meeting. This will be done in the form of a “quiz” at the *beginning of each class*. I will present you with a question(s) and give approximately 5 minutes to make your response without referring to your textbook or notes. Your answer(s) will be submitted with your name and this will serve as your attendance. Your responses won’t be graded as correct or incorrect, but I will keep track to monitor how the class is keeping up. This is also a good way for you to help identify areas that you might need to study more. This practice is actually in place to help you! Research suggests that repeated **retrieval** is the most effective way to learn. My goal is that by having you actively retrieve the information throughout the semester, you will better learn and remember the information from the course.

I will give you one free quiz point to start the semester. There are 24 class meetings this semester (excluding test days). As you will see detailed in the “Point Allocation” section, attendance quizzes contribute 20 points to your total score. What this means for you is that if you exceed 20 points (by attending everyday or only missing a few days), these will be bonus points added to your total score. You can miss up to 5 days of attendance quizzes without it impacting your total points. Also, if you are late for class and miss the

quiz, you cannot retake it and will forfeit your point for the day. If you have an absence excused by the college (e.g., observed religious holiday, death of an immediate family member, participating in a college sporting event, unplanned hospitalization), see me before the absence to discuss.

Students are expected to actively participate in class discussions and demonstrations. Students are welcomed and encouraged to share their questions, ideas, and insights during class discussions and lectures as long as they do not dominate the conversations. They are expected to respect the values, beliefs, and rights of others in the classroom. Also, students are expected to pay attention to whomever is speaking in class. Students should NOT text or use computers for reasons other than notes. This means no facebook, twitter, email, itunes, youtube, foursquare, pinterest, or anything unrelated to course material! This behavior not only distracts from your ability to learn in my class, but it disrespects and violates the right of other students to attend class and learn in a focused environment. Any students involved in side-conversations unrelated to class discussion, any of the above activities, or in any other behavior that is potentially disruptive to other students' learning may lose their attendance quiz point for the day at the Professor's discretion.

Tests and Final Exam: For this class there will be 3 tests. The tests will have short-answer and multiple-choice questions from the material covered in class and the textbook. There will not be a final exam, but a research paper will be due during finals week. The test dates are firm but the material covered may vary slightly from the syllabus depending on how the course progresses. Any deviations from the syllabus will be made clear prior to the test. Tests will have short-answer and multiple-choice questions from the material covered in class and the textbook. The final exam will be comprehensive.

Students are expected to take all tests on the scheduled dates. If an extreme circumstance (illness and workload do not apply) arises then the student should contact the professor prior to the test and the professor will decide what will be done.

To do well on the tests, students must come to class and read the class materials very carefully. Historically, students that have done the best have read the textbook carefully several times, taken notes from the textbook, and studied several days prior to the tests.

Research Project: The research project will consist of three primary components: written proposal, oral presentation and final written paper. You can work alone or in groups of up to 3. If you work in a group, you will carry out all aspects of the project together and each individual will receive the same grade. Once you have selected your group and submitted your written proposal, your group membership cannot be changed. In most workplaces today, group projects are common. You will need to learn to deal with possible interpersonal conflicts and be sure that everyone is carrying their own weight in the project. You will complete a group work contract and a portion of your grade will be based on adherence to the contract and peer evaluation.

Written Research Proposal

With your teammates (if applicable), you will develop a written research proposal, outlining the study that you intend to conduct. The proposal must be in APA style – more information on APA style will come during the semester. Further details of the proposal, and a rubric for grading, will be provided during the semester. This is worth a total of 30 possible points.

Final Research Presentation

With your teammates (if applicable), you will prepare and give an oral presentation of your finalized research study (using PowerPoint) to our class. Further details of the presentation, and a grading rubric, will be provided during the semester. This is worth a total of 50 possible points.

Written Final Research Paper

You and your teammates (if applicable) will write a final version of your research study. The final version must be in APA style – more information on APA style will come during the semester. Further details of the paper, and a rubric for grading, will be provided during the semester. This is worth a total of 100 possible points.

APA Assignments: Each student will complete 5 projects related to APA style and writing throughout the semester. Unless otherwise specified, all writing assignments in this course must conform to writing guidelines for APA style (6th edition), including formatting, grammar, spelling, and word usage. The project guidelines will be posted on Moodle.

For each project, students need to type their responses using a 10-point Times New Roman font and they need to keep the assignments to the 1 page they are given. They also need to make sure their assignments are free of errors and well-written. Students need to paraphrase from their textbook or articles instead of using direct quotes and citations are not needed. Finally, students need to turn in a hard copy to the professor and not submit projects via e-mail (unless they are late).

Late projects will be penalized a grade letter for being late and then another grade level for every additional 24 hours that they are late. Students should e-mail the professor their late projects.

LIVING HONORABLY

Everyone has pledged to follow [Agnes Scott College's Honor System](#) as outlined in the student handbook. The following statement on academic honesty comes from the faculty Committee on Academic Standards and Admission of Agnes Scott College (ASC Faculty Meeting Minutes, Attachment 5. May 11, 2012.)

Academic Honesty: The Agnes Scott College honor code embodies an ideal of character, conduct, and citizenship, and is an important part of the College's mission and core identity. This applies especially to academic honesty and integrity. Passing off someone else's work as your own represents intellectual fraud and theft, and violates the core values of our academic community. To be honorable, you should understand not only what counts as academic dishonesty, but also how to avoid engaging in these practices. You should:

- ❖ review each course syllabus for the professor's expectations regarding course work and class attendance.
- ❖ attribute all ideas taken from other sources; this shows respect for other scholars. Plagiarism can include portraying another's work or ideas as your own, buying a paper online and turning it in as if it were your own work, or not citing or improperly citing references on a reference page or within the text of a paper.
- ❖ not falsify or create data and resources or alter a graded work without the prior consent of your professor. This includes making up a reference for a works cited page or making up statistics or facts for academic work.
- ❖ not allow another party to do your work/exam, or submit the same or similar work in more than one course without permission from the course instructors. Cheating also includes taking an exam for another person, looking on another person's exam for answers, using exams from previous classes without permission, or bringing and using unauthorized notes or resources (i.e., electronic, written, or otherwise) during an exam.
- ❖ not facilitate cheating, which can happen when you help another student complete a take home exam, give answers to an exam, talk about an exam with a student who has not taken it, or collaborate with others on work that is supposed to be completed independently.
- ❖ be truthful about the submission of work, which includes the time of submission and the place of submission (e.g., e-mail, online, in a mailbox, to an office, etc.) You should understand that penalties result from dishonest conduct, ranging from failure of the assignment to expulsion from the college. You should speak with your professors if you need clarification about any of these policies.

Modified Pledge

Students pledge that they have completed assignments honestly by attaching the following statement to each test, quiz, paper, overnight assignment, in-class essay, or other work:

I pledge that I have neither given nor received any unauthorized aid on this assignment.
(Signed) _____

OTHER INFORMATION ABOUT THE CLASS

Departmental Tutor: The Psychology Department has four free tutors which students can meet with. They will be in the Data Analysis I room -- 1st floor BSC or 112W BSC (reviews will take place in this room) in the psychology department BSC. Tutors will always be in one of those two rooms. Their hours are:

Nastacia Pereira's Hours
Sunday 3-5p.m. and 6-9p.m.

Angela Galioto's Hours
Monday 4:30-6:30p.m.
Wednesday 4:30-7:30p.m.

Yun (Winnie) Jiang's Hours
Monday 6-9p.m.
Tuesday 5-9p.m.
Thursday 6-9p.m.

Ore Adekunle's Hours
Tuesday 10-11:15a.m.
Thursday 10-11:15a.m., 2-5p.m.

Course Evaluations: Students' feedback about this course is valuable to the professor, the psychology department, and the college administration. Students' comments are taken seriously and the comments are used to improve the course in the future. Students will be asked to complete evaluations of the course at the end of the semester.

Disability Accommodations: Agnes Scott College seeks to provide equal access to its programs, services and activities for people with disabilities. All accommodations for disabilities are authorized through the Office of Academic Advising (please see the contact information listed below to complete the registration process). Once registered, please contact me so we can discuss any specific accommodations needed for this course. Both Academic Advising and the faculty respect students' confidentiality when accommodations are made.

Kelly Deasy, Coordinator of Student Disability Services

POINT ALLOCATION

APA Projects (5 x 20 points)	100
Attendance "Quiz" Points (can earn up to 25***)	20
Test 1	100
Test 2	100
Test 3	100
Research Proposal	30
Research Presentation	50
<u>Research Paper</u>	<u>100</u>
Total Points	600

GRADING SCALE (%)

A = 93 - 100	A - = 90 - 92
B+= 87 - 89	B = 83 - 86
B -= 80 - 82	C+ = 77 - 79
C = 73 - 76	C - = 70 - 72
D+ = 67 - 69	D = 63 - 66
D - = 60 - 62	F = 59 or less

***Reminder – there are 24 days on which attendance quizzes will be given (plus the free bonus point). So by attending class every day, you can earn up to 5 extra points added to your total points score.

Research Design and Methods Schedule

(Although every effort will be made to follow the syllabus, I reserve the right to make changes.)

Class Date	To Read Before Class	General Topic	Project Due Date
Thurs. Aug. 29		Introduction	
Tues. Sept 3	Chapter 1	Introduction to Scientific Research	
Thurs. Sept 5		Introduction to Scientific Research	
Tues. Sept. 10	Chapter 2	Research Approaches and Methods of Data Collection	
Thurs. Sept. 12		Research Approaches and Methods of Data Collection	Project 1
Tues. Sept. 17	Chapter 3	Problem Identification and Hypothesis Formation	
Thurs. Sept. 19	Chapter 4	Ethics	
Tues. Sept. 24	Chapter 5	Measuring Variables and Sampling	
Thurs. Sept. 26		Test 1	Project 2
Tues. Oct. 1	Chapter 6	Research Validity	
Thurs. Oct. 3		Research Validity	
Tues. Oct. 8	Chapter 7	Control Techniques in Experimental Research	
Thurs. Oct. 10		Fall Break!	
Tues. Oct. 15		Control Techniques in Experimental Research	Written Research Proposal Due
Thurs. Oct. 17	Chapter 8	Experimental Research Design	
Tues. Oct. 22		Experimental Research Design	
Thurs. Oct. 24	Chapter 9	Procedures for Conducting an Experiment	Project 3
Tues. Oct. 29	Chapter 10	Quasi-Experimental Designs	
Thurs. Oct. 31	Chapter 11	Single-Case Research Designs	
Tues. Nov. 5		Test 2	
Thurs. Nov. 7	Chapter 12	Survey Research	
Tues. Nov. 12	Chapter 13	Qualitative and Mixed Methods Research	Project 4
Thurs. Nov. 14	Chapter 14	Descriptive Statistics	
Tues. Nov. 19	Chapter 15	Inferential Statistics	
		Preparing the Research Report for Presentation or Publication	
Thurs. Nov. 21	Chapter 16	Publication	Project 5
Tues. Nov. 26		Test 3	
Thurs. Nov. 28		Happy Thanksgiving!	
Tues. Dec. 3		RESEARCH PRESENTATIONS	
Thurs. Dec. 5		RESEARCH PRESENTATIONS	
Dec. 12-17		Final Exam Week – Research Paper Due
